

KWHCoin Token Sale

How to Participate using myetherwallet.com

Disclaimer: We offer the following instructions only as helpful guidance on one ERC20 wallet option for participating in the token sale. Buyers should do their own research and not rely solely on material we are presenting. We make no representations or warranties that the following material is complete or accurate, or that myetherwallet (or any associated software or services) will be reliable or function as described. As such, Buyers assume all risks associated with the use of myetherwallet (or any other ERC20 wallet) in connection with the token sale. For the terms and conditions concerning the token sale please visit [here](#) (Note: this link will be active shortly before the crowdsale.)

Step One:

Go to myetherwallet.com. Take all necessary precautions to avoid potential security or fraud issues.

Step Two:

If you have an account and want to use that account, sign in. If you need or want a new account, create one. This will create both private and public keys to your account.

- Choose a very strong password.
- Click "Create New Wallet."

DON'T GET PHISHED, please! ☹️ Thank you! ☺️
1. BOOKMARK MYETHERWALLET.COM 2. INSTALL EAL or MetaMask or Cryptonite

Create New Wallet

Enter a password

Do NOT forget to save this!

Create New Wallet

This password *encrypts* your private key. This does not act as a seed to generate your keys. You will need this password + your private key to unlock your wallet.

[How to Create a Wallet](#) · [Getting Started](#)

Already have a wallet somewhere?

- **Ledger / TREZOR / Digital Bitbox :** Use your **hardware wallet** . Your device *is* your wallet.
- **MetaMask** Connect via your **MetaMask Extension** . So easy! Keys stay in MetaMask, not on a phishing site! Try it today.
- **Jaxx / imToken** Use your **Mnemonic Phrase** to access your account.
- **Mist / Geth / Parity:** Use your **Keystore File (UTC / JSON)** to access your account.

- Now, follow the instructions on saving your public and private keys.

Save your **Keystore** File.

1 ➡️ **Download Keystore File (UTC / JSON)**

Do not lose it! It cannot be recovered if you lose it.
Do not share it! Your funds will be stolen if you use this file on a malicious/phishing site.
Make a backup! Secure it like the millions of dollars it may one day be worth.

2 ➡️ **I understand. Continue.**

Not Downloading a File?

- Try using Google Chrome
- Right click & save file as. Filename: UTC--2017-12-20T12-07-43.3

Don't open this file on your computer

- Use it to unlock your wallet via MyEtherWallet (or Mist, Geth, Parity and other wallet clients.)

Guides & FAQ

- [What are these Different Formats?](#)

Caveat: You will not be able to access your account if you lose this information. In addition, if someone is able to access it, they will be able to take whatever is in your account. Use all necessary precautions to avoid this scenario.

Step Three: Acquiring ETH

If you have sufficient ETH, you can skip this step. If you want to acquire ETH, then follow these steps. You can purchase ETH with world currencies such as dollars, euros, etc. on any of the well known cryptocurrency exchanges. When participating in a crowdsale you will need the

amount of ETH you are using for the token purchase plus a small amount of “gas,” a small amount for transactions fees.

Caveat: Use only your own ETH account to buy tokens in the token sale. Do not use your “exchange account” or you risk both failing to acquire tokens and potentially losing all your ETH.

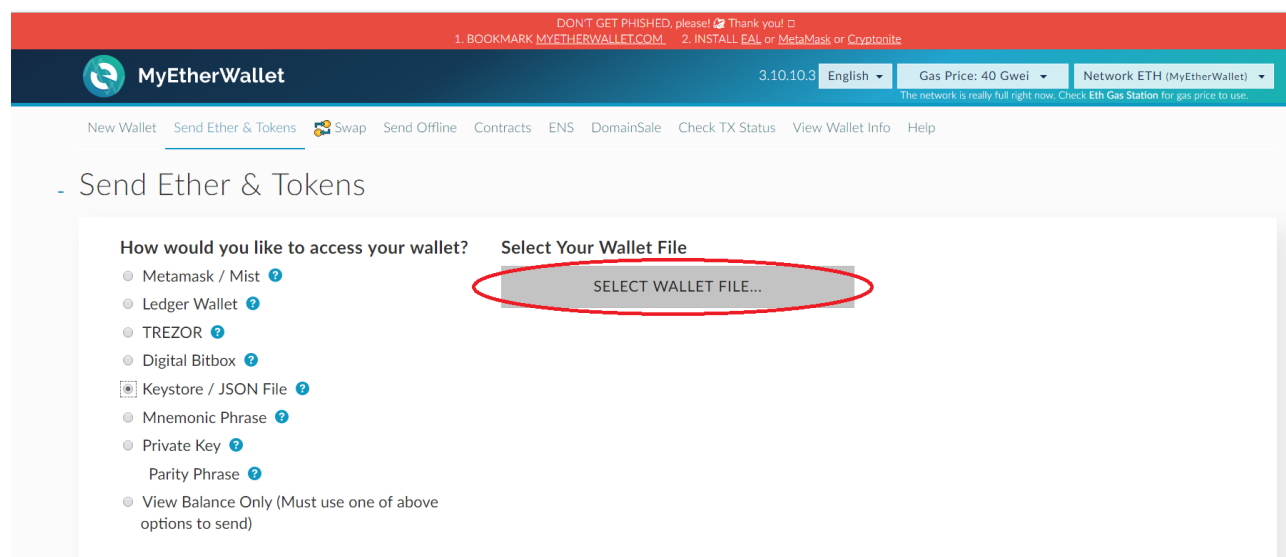

Step Four: Confirm the address for the token sale

Crowdsale address: 0xebc7cd2684dd96619841c7994343c5a8bda94b10

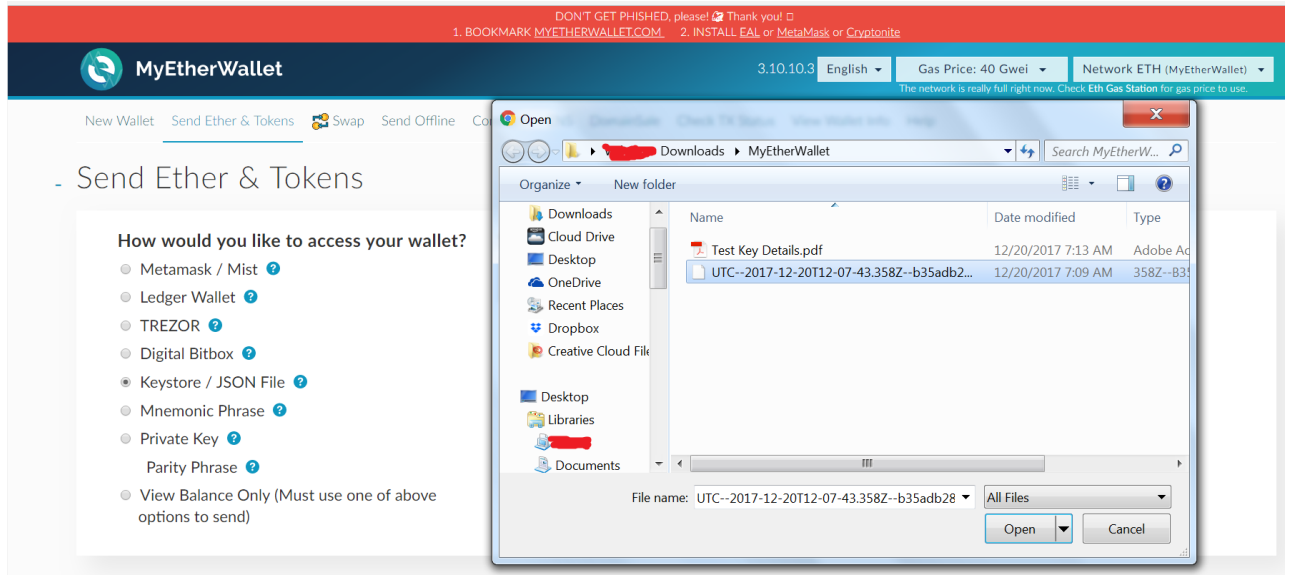

Step Five: Send ETH

Go to the “Send Ether & Tokens” tab in the myetherwallet.com application.

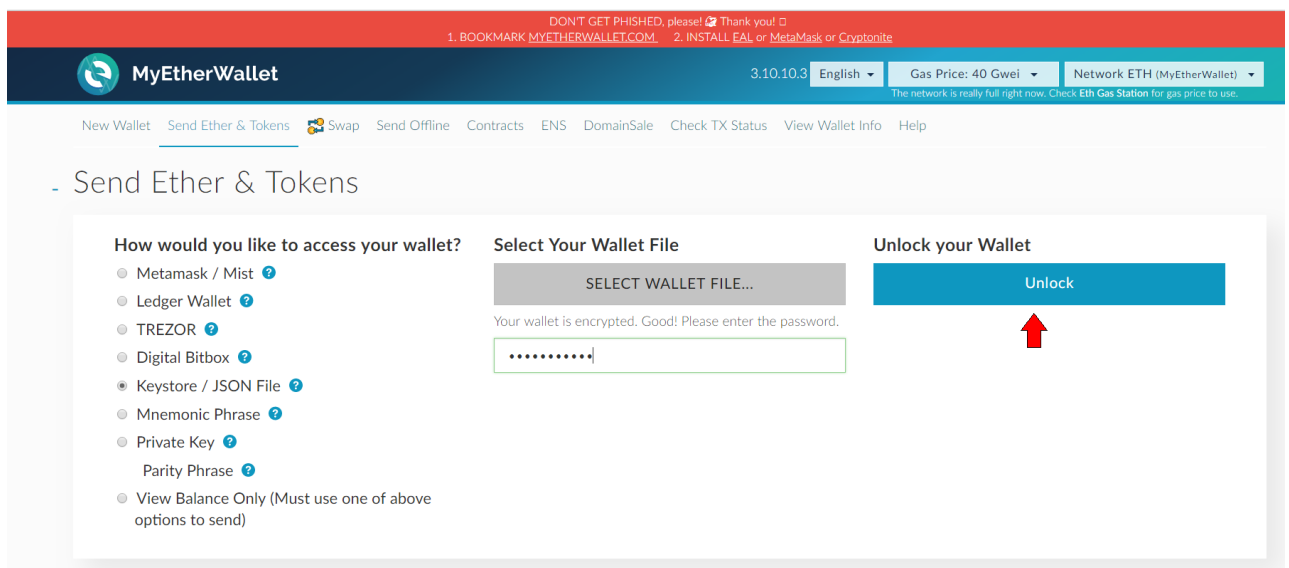

Select Keystore / JSON File and then click on “SELECT WALLET FILE”

Now browse to folder where you had saved the keystore file earlier and then select it and click on Open.

Type in your wallet password and click Unlock.

Open an account from which you wish to trade.

Fill out the “send transaction” form.

- In the “To address” field fill in the KWHCoin crowdsale smart contract address **(to be shared on KWHCoin site)** . Make sure the address is correct.
- In the “Amount to send” field add the amount of ETH you wish to use buying tokens.
- In the “Gas” field change the amount to a minimum of **300,000**. This is to ensure the transaction is processed.

- Below the “Gas” field there is a hotlink titled “+Advanced And Data.” Click on it. In the field that appears add the address which will be shared on the KWH website.
- Click on “Generate Transaction.”

Aw...you don't have any ETH Buy ETH with USD coinbase 1 ETH \$ 833.34 USD

Token Balances
Load Tokens

Remember, you can always view your Balances On

On the page that appears, click on “Send transaction.”

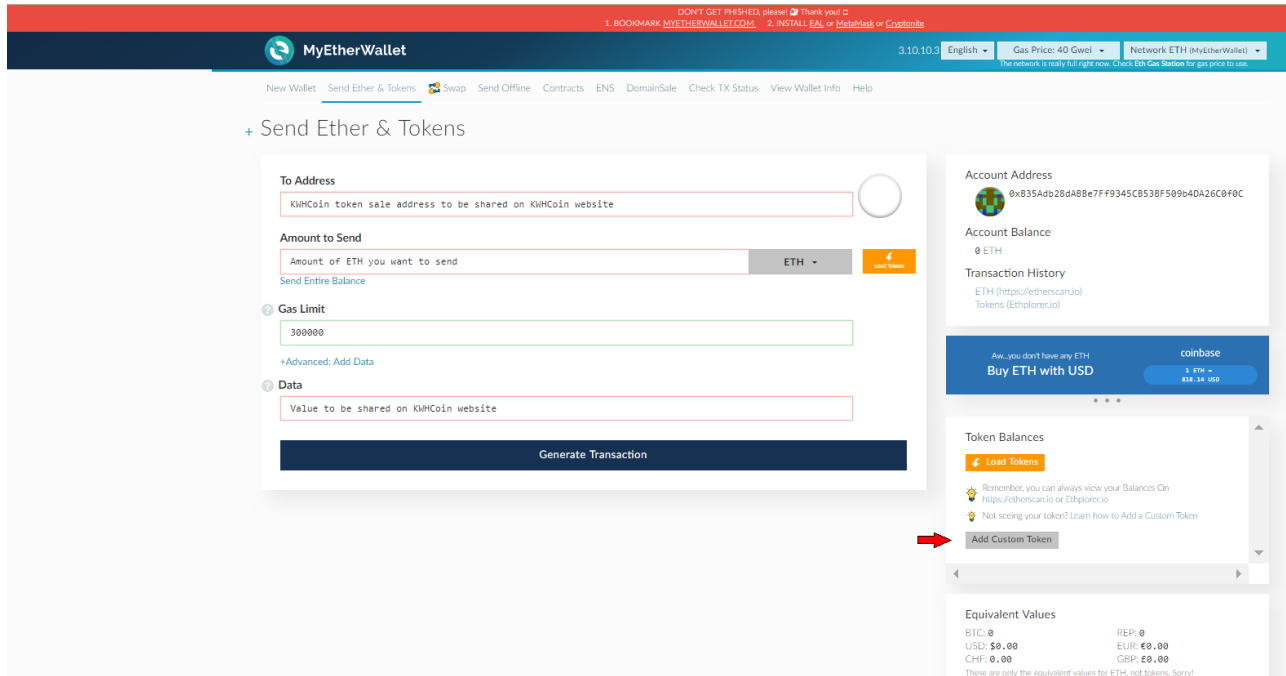

Myetherwallet will generate a check, asking if you can confirm the transaction. Confirm all the data is accurate. If this is all correct and you want to proceed, then click “Yes, I am sure! Make transaction.”

Once you have clicked on the “Yes, I am sure! Make transaction” button, DO NOT click on it again.

You have now purchased the amount of KWHCoin that corresponds to the amount of ETH you sent.

Step 6: View tokens

Go back to the “Send Ether & Tokens” tab and click on “Add Custom Token.”

In the “Token Symbol” field add the smart contract address. In the “Decimals” field add “18” and click “Save.”

The screenshot shows the 'Add Custom Token' form. It has the following fields:

- Token Contract Address:** A text input field with the placeholder text 'Address to be shared on KWHCoin website'.
- Token Symbol:** A text input field with the value 'KWH'.
- Decimals:** A text input field with the value '18'.

Below the fields is a 'Save' button.

Finally, click on “Show All Tokens” to see all the KWHCoin you own.
